	Deployment:	
	Microsoft IIS, Azure App Services, GitHub Pages, Azure Pipelines, GitHub Actions	
Experience	Nizam Sons (Pvt) Ltd. & Libermann International	February 2022 - Present
	Software Developer	Sialkot, Pakistan
During my time at Nizam Sons Private Limited as a Software Developer, I had the opportunity to work on various projects and develop my skills in coding, debugging, and problem-solving. I was also able to collaborate with a team of talented developers and contribute towards the success of the company's software solutions.		
<ul style="list-style-type: none">Developed and maintained software applications.Implemented new features and enhancements.Collaborated with team for efficient project completion.Improved user experience through UI/UX design updates.Conducted regular code reviews and provided feedback.		
Education	Secure Study School	2012 - 2014
	Sialkot, Pakistan	Matric (Computer Science)
	Punjab Group of Colleges	2015 - 2017
Sialkot, Pakistan		Intermediate in Computer Science (ICS)
Education	University of Sialkot	2018 - 2022
	Sialkot, Pakistan	BS Information Technology

Projects

Inventory Management System:

- Enabled real-time inventory tracking.
- Automated purchase order generation.
- Managed stock movements efficiently.
- Provided detailed reporting dashboards.

Production Planning and Control (PPC) Software:

- Optimized workflows and resource allocation for manufacturing.
- Enabled real-time tracking of production schedules and processes.
- Automated work order generation to streamline operations.
- Integrated demand forecasting, raw material tracking, and ERP for inventory management.
- Provided insights into machine utilization and labor productivity.

Provident Fund (PF) Management System:

- Automated contribution calculations and streamlined monthly processes.
- Enabled real-time tracking of employee PF balances.
- Supported claim requests and settlements with approval workflows.
- Provided detailed monthly reports for HR and finance teams.
- Enhanced overall efficiency in PF management.

NCR (Non-Conformance Report) Portal:

- Allowed users to log, track, and resolve non-conformance issues in real-time.
- Ensured compliance with industry standards for quality control.
- Improved overall product quality by streamlining the NCR management process.
- Provided detailed reporting and tracking for effective issue resolution.

Integrated Management System (IMS) Portal:

- Developed a portal to upload and manage PDF SOPs and Document Change Requests (DCRs).
- Built a user-friendly interface for document upload and search.
- Implemented database structure for SOP metadata and DCR tracking.
- Enabled secure access control and DCR approval workflows.

Restaurant Point of Sale (POS) System:

- POS System with an attractive and user-friendly interface tailored for restaurants, cafes, and hotels.
- Managed key operations, including order processing, table management, and inventory tracking.
- Integrated multiple payment methods (Cash, Card, e-Wallet) for flexible transactions.
- Streamlined payment integration for efficient transaction handling.

Advanced Reporting Solutions using SSRS, Crystal Reports, and Power BI:

- Implemented reporting solutions with SSRS, Crystal Reports, and Power BI.
- Created custom SSRS reports for financial and operational data.
- Generated pixel-perfect reports using Crystal Reports.
- Integrated Power BI dashboards for dynamic data visualization.
